

Dear Mass Spectrometry Fan and/or User,

Registration for the inaugural event of the Colorado Biological Mass Spectrometry Society event is now open at <http://www.cbmss.org/events.html>.

The event will be held **Tuesday, July 15th at the Warwick Hotel in Denver from 5:00 – 7:30 pm**. We are very excited to welcome Dr. Richard Smith, Battelle Fellow and Chief Scientist from the Pacific Northwest National Laboratory, as our keynote speaker. Thanks to the generous support of our sponsors, the inaugural event will be at no cost for members (Non-members \$25, Post-docs and students: \$5, or free with membership). Membership details can be found at our website <http://www.cbmss.org/Membership.html>.

Schedule for the event:

Reception	5:00-5:45
Dinner	5:45-6:30
Keynote speaker	6:30-7:30

There will be a business meeting preceding the event from 4:00-5:00, everyone is welcome and encouraged to attend.

Please feel free to forward this to anyone whom you think might be interested.

We look forward to seeing you there!

Sincerely,
Jessica, Kirk, and Nichole

Nichole Reisdorph, Ph.D.
National Jewish Medical Center
Director, Mass Spectrometry Facility

Kirk Hansen, Ph.D.
University of Colorado Health Science Center
Manager, Proteomics Core Facility

Jessica Prenni, Ph.D.
Colorado State University
Director, Proteomics and Metabolomics Facility

The mission of the CBMS is to foster a community comprised of local researchers interested in the field of proteomics and metabolomics and to serve as a forum intended for the dissemination of knowledge and professional experience. As a neutral gathering, the CBMS will facilitate interaction, and encourage collaboration between academic and industrial researchers, and maximize the usage of existing resources in the region. In addition, the CBMS will serve the growing need for education and exposure in biological mass spectrometry applications for local graduate students, post-doctoral scientists and researchers new to the field.
