

Cutting-Edge Discoveries In Action

Fitzsimons Innovation Community members are working on world-changing developments in bioscience and healthcare, and they're doing it in workspace customized to their projects.

It's been a remarkable year for the Community—new patents, scientific breakthroughs, workforce growth, capital raises, and strategic partnerships contribute to the collective impact. **Fitzsimons Innovation Community** is proud of these accomplishments and looks forward to sharing more about what's driving momentum in the new year.

25M+ Capital Raised

Companies attracted more than \$25 million in investments to advance R&D, accelerate commercialization, support clinical trials, and fine-tune technology.

12+ Patents

Companies received more than 12 patents for their innovations, a 50% increase over the prior year.

16+ New Innovations

Companies introduced more than 16 new innovations to the market, from pharmaceuticals to molecular biology to medical devices.

35% Companies Forging Strategic Partnerships

Partnerships evolved from primarily research collaborations to deployment, manufacturing, and accounting partnerships as companies advanced their innovations.

61% Companies Making Discoveries

Major breakthrough discoveries in pharmaceuticals, cell and gene therapy, medical devices, molecular biology, and diagnostics.

91% Companies Thriving

Majority of companies reported either no change to workforce or added employees.

92% Companies Satisfied

Companies appreciate access to resources, opportunities to interact, proximity to research institutions, and the value offered by Community membership.
