Professional experience summary

Ali Loveys is an Executive Director in EY's Healthcare Advisory practice and EY's healthcare blockchain leader. Dr. Loveys has over 20 years of experience in leading innovation and optimization of health information technology (HIT). She is dually medical board certified in primary care and clinical informatics. Her work bridges clinical, business, and IT policies, regulations, and standards within healthcare.

Engagement experience

- Dr. Loveys was part of a team for the Digital strategy for the Children's Hospital of Philadelphia. Engagement work included governance, personnel requirements, and digital portfolio management.
- Founding member of the governance committee that formed the greater Rochester Regional Health Information Organizations, one of the nation's earliest and most successful RHIOs. She went on to be the first vice-chair of the RHIO's board of directors.
- As CMIO of IT Practice Consulting, Corp. (ITPC) she was the lead as an extension agent of one of the two Regional Extension Centers in New York State that assisted practices in meeting Meaningful Use Requirements for the Medicare or Medicaid EHR Incentive Programs. Dr. Loveys has helped over 1000 physicians implement and optimize their Electronic Health Records, positively impacting thousands of patient lives.
- Dr. Loveys has collaborated extensively with companies to develop technology or hone products used in healthcare. Some of her clients include, Eastman Kodak Company, Welch Allyn, ACM Medical Laboratories, Ivedix, First Data and Clover. Many of these products have a mobile platform component.
- Dr. Loveys does or has served on a variety of advisory boards or as a mentor to advance clinical informatics including, Optum Health, the American Academy of Pediatrics Child Health Informatics Center and Health 2.0 VC to DC challenge. She has developed national HIPAA Privacy and Security compliance programs.
- She won the Spirit of HIMSS award for her work as part of the HIMSS Katrina Phoenix Project helping medical practices destroyed by hurricane Katrina with disaster recovery and conversion to electronic medical records.
